In accepting the chairmanship, Cleary said, "The American Cancer Society has pledged itself to step up its program to reduce deaths from cancer and to enlarge its state and national research effort. Today there are 30,000 people in Massachusetts under treatment from cancer and 19,000 new cases will develop in the Commonwealth in 1966.

"People must know about cancer to act properly and at the proper time. I am confident with an increased number of volunteers at the local level who want to serve in a great humanitarian effort, we will accomplish much. I am happy and honored to undertake such a challenging and humanitarian assignment.

on taking precautions to prevent possible heart trouble on a family-wide basis, the Heart Association said.

For heart and health habits formed early in life can make the difference between high or low heart attack risk in one's middle years.

The Association issued the following "Ten Commandments for Living with your Heart."
